

QTX QR12 PA - A Practical System With Countless Applications

This compact system has a myriad of applications. It's perfect for anyone who needs a simple, portable PA system which can switch between music and vocal address. For instance, it would be ideal for fitness classes, meetings, conferences, weddings, small events, buskers, house parties, car boots, markets and classrooms.

Vocals On The Go

A pair of **VHF handheld wireless microphones** are included with the QR12PA and the radio receiver is built into the mixer/amp section at the rear along with 2 extra mic inputs (with echo) if you prefer to use your own wired mics. The VHF frequencies are given on the box so, if you preferred, it would be easy to find another microphone which you could use with the system such as a head mic or tie clip.

Play Your Own Music Collection

The QR12PA has an inbuilt **mp3 player** meaning you can connect a USB stick or SD Card and play mp3s straight from the system. Alternatively, use the line in with an aux lead (not included) and attach an ipod/mp3 player. The **remote control** is a nifty little feature which gives you control over the volume and mp3 functions without having to go and fiddle with the main system.

Lightweight and Hugely Portable

The QR12PA is hugely portable compared to many other systems. It has a suitcase style retractable **trolley handle and rear wheels** which provide easy transportation along with the moulded carry handle and rugged ABS outer case. The PA system also boasts a 35mm speaker pole mount socket if you choose to mount the system and three M8 flying points on the top if you want to install it.

Power In Any Location

The system operates either from the mains or from the **internal re-chargeable battery** which lasts for up to 8 hours. This is extremely useful for any outside performances or any usage in places where mains power is not readily available meaning the system is always ready to go without requiring long set-up. It also has a +12v input meaning you could even run it off a car battery!

The QR12PA's massive feature set and useful physical design touches make it the perfect PA system for small events and performances on the go.

Specifications

- **Inputs:** 2 x Microphone, 1 x Aux
- **Power Output (RMS):** 100 W
- **Main Driver:** 12"
- **Frequency Response:** 48 Hz - 20 kHz
- **SPL:** 100 dB
- **Microphones:** 2 x VHF Handheld
- **Wireless Microphone Frequencies:** 174.1 MHz and 175.0 MHz
- **Microphone Effects:** Echo
- **Media Player:** Internal USB/SD
- **Battery Life:** Up to 8 Hours
- **Transportation:** Built-In Trolley
- **Housing:** Rugged ABS
- **Controls:** Mic Volume, Echo, Bass, Treble, Volume, VHF Mic Volumes
- **Height:** 570 mm
- **Width:** 310 mm
- **Depth:** 350 mm
- **Weight:** 14 Kg
